TITLE : ACYCLIC NUCLEOTIDE CYCLIC
PHOSPHORAAMIDATE AND RELATED
COMPOUND THEREOF

I

II

III

IV

ABSTRACT : NEW MATERIAL: An acyclic nucleotide expressed by formula I [R is formula II (R₁~R₃ are H or lower alkoxy), formula III or formula IV (R₄ is H or alkyl); R' is H, alkyl, aryl, aralkyl or R; B is purine ring, pyrimidine ring orazole ring].

EXAMPLE: 1-[3-Hydroxy-1-t-butylidimethylsilyl-2-propoxymethyl]uracil.

USE: An antiviral agent or antitumor agent.

PREPARATION: A compound expressed by formula I (R and R' are simultaneously H) is reacted with a compound expressed by the formula RX (R is a group of formula II or formula III; X is halogen) at room temperature or below to provide the aimed product. A basic solvent such as pyridine, etc., may be used as a solvent, but the above-mentioned reaction may be carried out using a nonpolar solvent in the presence of tertiary base.
